

ROMANIA'S PAYMENT REPORT
for the year 2019 free allocation of emission allowances,
under Article 10c of the EU ETS Directive

A. General overview

By the Decision C(2012) 4564 final, the European Commission – *DG Climate Action* authorized on the 6th of July 2012, the Application of Romania for free allocation of allowances to the power sector for the period 2013 – 2020, pursuant to article 10c of Directive 2003/87/EC, as amended, hereinafter called "*the EU ETS Directive*".

On the 5th of December 2012, the European Commission – *DG Competition* issued the Decision C(2012) 8776 final, and approved the Application of Romania, finding that the state aid involved in the implementation of this derogation is compatible with the EU internal market.

Based on these two decisions and in line with the Romanian Application, Romania developed the institutional and legal framework for the implementation of the derogation for free allocation of greenhouse gas emissions allowances to electricity generators provided by article 10c of the EU ETS Directive by adopting the Government Decision no. 1096/2013 for the approval of the mechanism to transitionally allocate free of charge of greenhouse gas emission allowances to electricity producers, for the period 2013 – 2020, including the National Investment Plan thereof.

During 2015-2017, new legislative acts were adopted in order to make possible the implementation of the National Investment Plan pursuant to Article 10c of the EU ETS Directive, such as:

1. **The Government Decision no. 151/2015, published in March 2015** that amends the *Government Decision no. 1096/2013 for the approval of the mechanism to transitionally allocate greenhouse gas emission allowances free of charge to electricity producers for the period 2013-2020, including the National Investment Plan*, in order to clarify some of the details regarding the implementation mechanism of the National Investment Plan;
2. **The Government Emergency Ordinance no. 30/2015, published in June 2015, regarding some measures for the implementation of the mechanism to transitionally allocate greenhouse gas emission allowances free of charge to electricity producers for the period 2013-2020, including the National Investment Plan**, that represents the primary legal framework for setting up and approving the budget necessary to the activities related to the monitoring and implementation of the investments in the National Investment Plan;
3. **The Government Decision no. 770/2015, published in September 2015** that amends the *Government Decision no. 1096/2013*, as further amended and completed - secondary legal framework adopted to ensure the implementation of the *Government Emergency Ordinance no. 30/2015*;
4. **The Government Decision no. 550/2016, published in August 2016**, by which there were approved the Framework Financing Contracts as per types of investments, as follows:
 - (i) investments finalized as of the date the Financing Contract is concluded;
 - (ii) investments under implementation as of the date the Financing Contract is concluded;
 - (iii) new investments.

5. *Law no. 183/2017, published in July 2017 for the approval of Government Emergency Ordinance no. 30/2015, regarding some measures for the implementation of the mechanism to transitionally allocate greenhouse gas emission allowances free of charge to electricity producers for the period 2013-2020, including the National Investment Plan.*
6. *The Procedures on the management of the counter value of the greenhouse gas emissions allowances transitionally allocated free of charge, for financing the investments in the National Investment Plan, monitoring, verification and reporting on investments, and eligible expenses (hereinafter called "the NIP Procedures"), have been approved by the Minister's Order no. 1277/30.10.2015, published on the 12th of November 2015, in the Official Journal of Romania, Part 1.*

According to the Government Emergency Ordinance no. 30/2015, the authority in charge with the mechanism implementation is the Ministry of Energy, Small and Medium Size Enterprises and Business Environment, presently the Ministry of Energy. Based on the *Government Emergency Ordinance no. 55/2015 providing some measures for the reorganization at the level of central public administration and for amending and completing some legal acts* it was established the Ministry of Energy, which took over the activities and the structures from the Ministry of Energy, Small and Medium Size Enterprises and Business Environment. Therefore, the Ministry of Energy is now the authority in charge with the implementation of the mechanism to transitionally allocate free of charge of greenhouse gas emission allowances to electricity producers, for the period 2013 – 2020, including the National Investment Plan thereof.

B. The amount paid justifies the proposed allocation for 2019

According to article 7 of the Government Decision no. 1096/2013, as further amended and completed, the payment of the counter value of the greenhouse gas emission allowances transitionally allocated free of charge, is performed in two instalments, as follows:

- a) the first instalment, within the period 5 April – 31 December of the year for which they are allocated;
- b) the second instalment, within the period 5 October – 31 December of the year for which they are allocated.

The counter value of the greenhouse gas emission transitionally allocated free of charge is established using a reference market price for a greenhouse gas emission allowance for each instalments, according to the provisions of Commission Decision C(2012) 4564 final of 06th of July 2012.

The reference market price for a greenhouse gas emission allowance is determined twice per year, on April 1st and on October 1st.

The payment of the counter value of the greenhouse gas emissions allowances transitionally allocated free of charge, using the reference market price is made, for each of the two instalments, as follows:

- a) for the first instalment, that applies for 50% of the greenhouse gas emissions allowances allocated for the current year, the reference market price is the price determined on the 1st April as a simple average of the auction prices on the EEX common platform during the first quarter of the year of allocation;
- b) for the second instalment, that applies for 50% of the greenhouse gas emissions allowances allocated for the current year, the reference market price is the price determined on the 1st October as a simple average of the auction prices on the EEX common platform during the third quarter of the year of allocation.

According to the Government Decision no. 1096/2013, article 9 (6), the greenhouse gas emissions allowances allocated based on article 10c and not paid are notified by the Ministry of Energy, in order to be auctioned on the common platform, according to applicable law.

For the allocation for 2019:

- ✓ for the first instalment, the reference market price calculated as a simple average of the auctions prices on the EEX common platform during the first quarter of 2019 is of 21.92 EUR/EUA;
- ✓ for the second instalment, the reference market price calculated as a simple average of the auctions prices on the EEX common platform during the third quarter of 2019 is of 27.02 EUR/EUA.

The authority in charge determined that the market price laid down in Annex VI of the Communication for the allocation year 2019 deviates by more than 10% from the reference market value calculated based on the methodology approved by Decision C(2012) 8776 final.

Annex I to this report contains a detailed overview of the EEX relevant auctions during the first and third quarters of 2019. The reference market prices for 2019 were published on the Ministry of Energy web site on the 1st of April and on the 1st October, 2019.

The allocation for 2019 for the 39 installations amounts 2,550,356 EUAs and it was paid as follows:

- ✓ in the 1st instalment were paid a number of 916,441 EUAs at the Q1 reference market price of 21.92 EUR/EUA with a total amount of 20,088,386.90 EUR;
- ✓ in the 2nd instalment were paid a number of 806,575 EUAs at the Q3 reference market price of 27.02 EUR/EUA with a total amount of 21,793,656.50 EUR.

The exchange rates for the conversion from the national currency (LEI) to the amount in EURO are corresponding to the exchange rate for the day of performing the respective payment.

For the 1st instalment of the 2019 allocation, 14 operators paid a total of 916,441 greenhouse gas emission allowances, and for the 2nd instalment, 7 operators paid 806,575 greenhouse gas emissions certificates.

From total allocation for 2019, provided in the list of maximum allocation per installations (NAT) pursuant to Article 10c of the EU ETS Directive, of 2,550,356 EUAs, a number of 1,723,016 were paid (representing 67.56 % of the total).

This value of 2,550,356 EUA differs slightly from the total number of GES allowances freely allocated to Romania for the year 2019 of 2,550,354, foreseen in **Chapter B.2. Total quantity of free allocation** in the *Application sent by Romania under Article 10c (6) of Directive 2003/87/EC*. This total quantity freely allocated (TQFA) of 2,550,354 is the starting point for calculating the number of the unused allowances.

Thus, the total of GES allowances for 2019 which will not be uploaded in the operators' accounts is 827,338 allowances, respectively:

$$2,550,354 - 1,723,016 \text{ allowances} = 827,338 \text{ allowances}$$

Therefore, a number of 827,338 EUAs from the allocation for 2019 pursuant to Article 10c of the amended EU-ETS Directive will be added to the auction total in 2021 on the common auction platform.

For 2019, Romania finds that the amounts paid by the operators listed in the Payment Report, Annex II attached, justifies the allocation of greenhouse gas emissions allowances as provided in column "H" of Sheet 3: Total 2019 and that this quantity is within the limit approved by the European Commission under article 10c of the EU ETS Directive.

C. Modifications of the names of the operators, as compared to Payment Report for 2018

During 2019 were not notified other modifications of the names of the operators/installations during 2019, as compared to the Payment Report for 2018.

D. Cases of cessation of activity of some installations under article 10c

During 2019 the Ministry of Environment did not informed the Ministry of Energy about cessation cases of operation for the installations under article 10c of the EU ETS Directive.

E. CONCLUSIONS

Out of the total quantity of free allocation (TQFA) for 2019, as listed in the Application of Romania in the table "*B.2. Total quantity*", of 2,550,354 EUAs, a number of 1,723,016 EUAs paid by the operators are going to be issued into their Registry Accounts.

Therefore, a number of 827,338 EUAs from the allocation for 2019, will be added to the auction total in 2021 on the common auction platform.
